**Subject:** 10009122

Hi, Jan,

Please conduct search for the following peptide sequences against commercial protein and interference databases for application 10009122 with at least 50 search results, as timely concerned:

1. Formula I: Xaa1-Xaa2-Xaa3-Xaa4 (each of Xaa 1, 2, 3 and 4 has been defined in the claim 1).
2. SEQ ID NOs 1-7, 9, 18, 20, 23 and 24.

Jan, if searching the above-mentioned 12 peptides (**short peptides consisting of amino acid residues between 4-9**) becomes a burden to you, please ignores SEQ ID NOs: 23 and 24 thereof.

Very best,

Samuel Liu
